

Reduce your labor costs by 5%

Take control of your bottom line

When you upgrade from excel or pen and paper to a user friendly workforce management software, you reduce your 2nd largest controllable cost - labor. Cost savings come from faster schedule creation, reduced overtime expense, lowered turnover, and enhanced labor efficiency.

On average you can expect to reduce labor costs by 5%, which is equivalent to increasing net profit by 30%.

You can evolve from the stone age to the digital age in 10 minutes, with 4 clicks of a mouse.

Join Sonic, Five Guys, and thousands of other restaurants in leveraging the power of award winning OpenSimSim Employee Scheduling Software. Contact us today!

Features That Lower Costs

Real-Time Cost Analysis

Get visibility into the most important metrics in your restaurant – your sales and labor cost, allowing you to make intelligent labor management decisions on the fly

Time & Attendance

Take control of your business and manage your time & attendance with our fully integrated TimeClock. Prevent buddy punching and avoid time theft while staying compliant with ever changing labor laws.

End-to-End Integration

Unleash the power of Heartland Restaurant POS. Make smarter labor management decisions by integrating Heartland Restaurant POS to sync sales data, labor data, wages and enforce schedules.

Compliance Management

Protect your business from costly compliance violations. With overtime alerts, break management and certification management, our compliance engine has you covered.
